INDEX 1995

January	1-56	July	313-368
February	57-112	August	369-416
March	113-168	September	417-464
April	169-216	October	465-512
May	217-264	November	513-576
June	265-312	December	577-632

ADHESIVES, structural: how understanding failure leads to success (C), 190
AEROSPACE structural materials: present and future (A), 469
ALUMINIUM extrusions in marine applications (A), 65
ANALYSIS
Probing polymer interfaces using neutron reflectivity (A), 593
Spotlight on laboratory equipment (P), 247
Surface analysis: glow discharge spectroscopy (A), 471
Surface analysis of corrosion inhibitors (A), 68
Thermal imaging in the scanning microscope (A), 227
BIOMATERIALS: present and future (A), 332
CEMENT and concrete science (C), 599
CERAMICS
Reaction processing in the metals industry (A), 10
Materials file (P), 204
COMPOSITE MATERIALS
Have metal matrix composites proved their worth? (A), 8
Composite materials: the secrets of deformation and fracture (C), 16
Eddy current testing: inspecting composite materials (A), 180
Materials file (P), 204
A novel approach to polymer based composites (A), 317
Composite structures: a dual approach to design (A), 320
Polymer composites: recycling and energy recovery (A), 426
Composites in construction (C), 429
CONSTRUCTION
Aluminium promotes innovation in architecture (A), 383
Cement and concrete science (C), 77
Composites in construction (C), 429
European showcase for polymers in building (A), 385
CORROSION
Surface analysis of corrosion inhibitors (A), 68
Thin layer activation: measuring wear and corrosion (A), 184
The role of standards in corrosion testing (A), 274
Localised corrosion: a new evaluation approach (A), 522
EDUCATION
Transparent steel: the teaching of creative design (A), 128
Focus on education and training (P), 299
Prototype tutorial system for engineering materials (A), 477
Professional development: the next steps (A), 479
Software matters in materials teaching (A), 481
ELECTRONICS
Electronic materials: development & innovation (A), 63
Three dimensional characterisation of electronic materials (C), 541
ENERGY EFFICIENCY
Reducing energy costs of plastics processing (A), 71
PEP Awards: Power for efficiency and productivity (A), 74
Gas awards recognise energy savers (A), 234
ENVIRONMENTAL ISSUES
Materials and the environment (P), 156
Polymer composites: recycling and energy recovery (A), 426
Feedstock recycling: mixed waste to materials resource (A), 428
EXPERT SYSTEMS
Expert systems in process control (C), 80
Real time expert systems: delivering real benefits (A), 173
FAILURE
Composite materials: the secrets of deformation and fracture (C), 16
Degradation of plastics: towards improved characterisation (A), 182
FUNCTIONALLY GRADED MATERIALS: tailoring properties (A), 474
HISTORY
Michael Faraday as a materials scientist (A), 374
Conservation of plastics: a race against time (A), 377
Of steelmakers and knotted string (A), 82
IMAGE PROCESSING
Image processing and optic technology (E), 22
Spotlight on laboratory equipment (P), 247
INFORMATION from the Internet: materials on-line (A), 483
INTELLECTUAL property: organisation and exploitation (A), 76
JOINING
Precision joining with ultrasonic welding (A), 279
Welding polymers for geomembranes and geopipes (A), 282
The gas turbine laptop: a new era for solders (A), 422
LAW: materials innovation and intellectual property rights (A), 229
MACHINING, Solving your problems (C), 189
MAGNETIC MATERIALS
Melt spinning makes better magnetic alloys (A), 534
Ferrofluids enter new domains (A), 537
MICROSCOPY
Confocal microscopy reveals the third dimension (A), 20
Thermal imaging in the scanning microscope (A), 227
Spotlight on laboratory equipment (P), 247
Time dependent studies in transmission electron microscopy (A), 329
Focus on microscopy (P), 351
MOULDING
Gas assisted moulding for improved process economics (A), 119
Direct injection moulding of the impact zone (A), 592
NON DESTRUCTIVE TESTING
Measuring residual stress (A), 5
Eddy current testing: inspecting composite materials (A), 180
Virtual cross-sectioning of materials (A), 323
Inspex 95 (E), 445
Bar defect inspection using stray flux technology (A), 526
Adhesive bond inspection (A), 527
Testing without the breaks (P), 557
OPTICAL TECHNOLOGY & image processing (E), 22
PACKAGING
Starpack awards for packaging design (A), 231
Pharmaceuticals and packaging (C), 233
POWER GENERATION into the next century (A), 225
POLYMERS
Reducing energy costs of plastics processing (A), 71
Plastics on the road (C), 78
Plastics simulation software: the process in a box (A), 176
Materials file (P), 204
Conservation of plastics: a race against time (A), 377
K 95 - international showcase for plastics and rubber (E), 386
Feedstock recycling: mixed waste to materials resource (A), 428
Welding polymers for geomembranes and geopipes (A), 282
A novel approach to polymer based composites (A), 317
European showcase for polymers in building (A), 385
Polymer composites: recycling and energy recovery (A), 426
PRESIDENTIAL ADDRESS: Something new from something old (A), 334
PROCESSING
Reaction processing in the metals industry (A), 10
Reducing energy costs of plastics processing (A), 71
Expert systems in process control (C), 80
Real time expert systems: delivering real benefits (A), 173
PROFESSIONAL development: the next steps (A), 479
QUALITY
Total quality management: what the customer wants (A), 14
Testing variability: its impact on product quality (A), 123
RUBBER
Rubber research: the evolution of an organisation (A), 17
Materials file (P), 204
K 95 - international showcase for plastics and rubber (E), 386
Tyre technology: future developments (A), 588
SERVICES, contract and materials (P), 615
SMART structures: the materials issues (C), 131
SOFTWARE
Plastics simulation software (A), 176
A hard look at software (P), 453
STANDARDS, the role of, in corrosion testing (A), 274
STEEL
Of steelmakers and knotted string (A), 82
Ultra light auto bodies constructed from steel (A), 585
Direct casting of thin strip (A), 222
Annual rolling meeting (C), 596
STRUCTURAL MATERIALS: engineering application through scientific insight (C), 431
SURFACE ENGINEERING
Survey of surface engineering (P), 95
The remarkable properties of intermetallic alloys (A), 187
Surface engineering with carbon and nitrogen (A), 530
TECHNOLOGY FORESIGHT
Power generation into the next century (A), 225
A framework for the future (A), 286
Biomaterials: present and future (A), 332
Aerospace structural materials: present and future (A), 469
TELECOMMUNICATIONS, glass fibres for modern (A), 326
TESTING
Metrology and mechanical testing (P), 39
Testing variability: its impact on product quality (A), 123
The role of standards in corrosion testing (A), 274
Potential drop techniques for crack characterisation (A), 379
Inspex 95 (E), 445
THERMAL PROCESSING
Furnaces 95: the heat treatment event (E), 146
Spotlight on laboratory equipment (P), 247
Drivers for change in subcontract thermal processing (A), 271
The heat is on... (P), 400
VACUUM technology, a clean sweep of (P), 498
